Program Description

The Division of Wildlife brings staff specialists to provide a comprehensive training and experience utilizing resources from the Division of Wildlife, Division of Soil and Water, and the Council for Environmental Education. Participants will receive the award winning *Twenty/Twenty Projects and Activities for WILD School Sites*, WILD School Sites planning guide, and several other support publications, and a wealth of other resources. The focus will be on how to develop a WILD School Site and how to use it within the classroom and existing curriculum.

Program Goals

To assist participants in assuming an active role in enhancing, utilizing and sustaining outdoor classrooms on school sites by:

- Becoming acquainted with and knowledgeable about available resources and projects.
- Exploring how outdoor classrooms support good education practices and state education standards.
- Discovering the critical considerations for outdoor classroom use, enhancement, and sustainability.
- Experiencing practical outdoor classroom activities.
