HOW TO TAG & CHECK YOUR DEER

1 Protect your permits from the elements by placing them in a plastic bag or protective pouch before you hunt.

2 Immediately upon harvest and prior to moving the carcass, you must attach a game tag to the animal. Hunters need to make their own game tag from any material they choose and write legibly with an ink pen or permanent marker.

3 Attach the game tag to the animal. Game tag information must include the hunter's full name, date, time, and county of harvest.

4 Write the game tag information on the permit also. See number 5 on the other side of this brochure.

5 Complete the automated game check process and receive an 18-digit confirmation number. You must record this number on your permit.

6 The 18-digit confirmation number must also be attached to the animal. You can write it on the game tag if you choose.

When checking your deer online, it is best to have a printer connected to your computer. A game check receipt displaying the 18-digit confirmation number is issued and can be printed for your convenience. If you don't have access to a printer when completing the game check, you can access your customer account at wildohio.com to print your game check receipt.

To complete the game check process, attach the 18-digit confirmation number to the animal. The confirmation number must remain attached to the animal, or parts of the animal, forever. The number may be written on the back of the mount for proper identification.
